

# KENYA

- New Source of Data – KNBS – KHIBS
- Questions for other countries
- 1. Has any country experienced problems with Laboratory equipment? How did they handle the issue?
- Lessons learnt – It is important to have premix standards before starting the program.
- Guidelines should be developed for millers to use during implementation
- The certification process should be well defined and prior arrangements made before starting the program
- ECOSA should help countries to identify the certified suppliers for equipment and premix
