

Ethiopian Team

Available data sources for decision making

- National Micronutrient Surveys; DHS; Multiple indicator cluster survey(UNICEF); FAO Food basket balance sheet; Facilities data(Iron);HIES; Industrial Capacity Assessment Report/data

Issues and possible solutions

- Both iron, Vitamin A are public health problems(we need survey/study
- Consumption level data is not available (survey is needed)

Persons/institutions to be involved in resolving these issues

- GOs(EHNRI, CSA), Development Partners, Private sector, communities

Next Steps

- Organize Sensitization meeting/workshop for GOs and DPs, PS
- Prepare Action plan and implement : Surveys; FF activities; adaption of standards; legislation and law enforcement, M & E

Lessons learned from presentations & Questions for countries/experts

- Those started FF are better than those not started; Steps followed in setting FF standards
- Experience in handling diversified(G & T) staples foods
