|--|----------------------------|-------------------------|
| 1. Generally all the discussions were alright, but what caught my attention was the idea of eliminating the percentage/component of Vitamin A from the fortificant/premix for the flours, this could be ok since it may reduce the cost of purchasing premix for the manufacturers. The Vit A can then be added to other vehicles. On the experiments on baked products which was done by Philip Radhal, the spots to show the presence of iron was realised in both the control and the flour with added iron/fortified flour and there was no significant difference in the distribution of the spots. This may call for further investigations since no conclusions could easily be reached | Fri, Dec 17, 2010 4:27 AM  | <a href="#">Find...</a> |
| 2. Mainly catching up with what and where was going on in the arena of flour fortification. Also an ideal platform for networking. The talks and debates were also of interest to me as I learnt a lot   | Thu, Dec 16, 2010 6:51 PM  | <a href="#">Find...</a> |
| 3. The most helpful part of the meeting for me personally were the presentations of the country leaders and the shared successes and challenges from the miller's point of view. These truly gave an insight in the current status of the fortification initiative and the challenges that remain to be overcome.  | Tue, Dec 14, 2010 5:58 AM  | <a href="#">Find...</a> |
| 4. I liked the presentations with the experiences from some of the countries which have been very successful.  | Mon, Dec 13, 2010 1:02 AM  | <a href="#">Find...</a> |
| 5. Flour fortification by Small-capacity plants by the Malawian delegation. It was quite useful. Nigeria has just concluded its own model and it was nice to listen to the presentation and benefit from the challenges and lessons learnt. Fortification of maize flour is a challenge as over 90% of the domestic market is produced by the small-capacity plants  | Sun, Dec 12, 2010 4:26 AM  | <a href="#">Find...</a> |
| 6. Country presentations - Malawi and Tanzania. Think they were presenting the actual facts on the ground the reality cause the success of the whole fortification process will depend on how many people you are able to reach.   | Sun, Dec 12, 2010 1:10 AM  | <a href="#">Find...</a> |
| 7. Presentations by Industries, researchers and plenary discussions  | Fri, Dec 10, 2010 11:49 AM | <a href="#">Find...</a> |

5. What part of the meeting did you find most UNHELPFUL and why? If appropriate, please [Download](#) specify speakers or presentations.

|--|----------------------------|-------------------------|
| 1. All the parts of the meeting were ok and had enough sense only that the time allocated for the presenters seemed short  | Fri, Dec 17, 2010 4:27 AM  | <a href="#">Find...</a> |
| 2. None  | Thu, Dec 16, 2010 6:51 PM  | <a href="#">Find...</a> |
| 3. None  | Tue, Dec 14, 2010 5:58 AM  | <a href="#">Find...</a> |
| 4. I thought the presentation on small scale FF was not particularly helpful as the key issues to address incl how the Malawi SSF was implemented - I feel as if key issues were not addressed. I would suggest that perhaps more structured working groups were perhaps considered in the future  | Mon, Dec 13, 2010 1:02 AM  | <a href="#">Find...</a> |
| 5. I think the meeting was too cramped and did not give participants enough time to interract. secondly apart from given attention to countries who are just comming on board in the fortification programme, we need to give room for the countries that have been impleneting to learn from their experiences and challenges so that newer counties can avoid critical startup challengies/mistakes. | Sun, Dec 12, 2010 4:26 AM  | <a href="#">Find...</a> |
| 6. None. I think the whole programme was well planned.   | Sun, Dec 12, 2010 1:10 AM  | <a href="#">Find...</a> |
| 7. NONE  | Fri, Dec 10, 2010 11:49 AM | <a href="#">Find...</a> |

|---|----------------------------|-------------------------|
| 1. The time frame for the presentations should be adjusted so as to try and exhaust our points. If funds can allow then this may call for more days other than just one day for the meeting. But all said, these all call for more funds  | Fri, Dec 17, 2010 4:27 AM  | <a href="#">Find...</a> |
| 2. Maybe we can visit an area which has benefited from FFI intervention.  | Thu, Dec 16, 2010 6:51 PM  | <a href="#">Find...</a> |
| 3. The topic of the combined use of other flour improvers and fortification premixes was not addressed. Perhaps this could be discussed to optimize the supply of all additives to the flour in the mills.  | Tue, Dec 14, 2010 5:58 AM  | <a href="#">Find...</a> |
| 4. More focused meetings on specific topics, possibly more parallel sessions so that some general sessions could be shared and then more specific in depth and clearly facilitated sessions would be held e.g. to deal with certain constraints or situations that a country may face (e.g. standard setting could be one, how to develop a small scale FF program (incl key constraints) etc) so that countries can gain more specific knowledge on topics/problems that they are facing | Mon, Dec 13, 2010 1:02 AM  | <a href="#">Find...</a> |
| 5. Yes, the issue of sustainability and national governments commitment is crucial. We may need a Regional approach to solving the issue of Advocacy to our policymakers in both private and public sectors on the issue of ownership of fortification programmes. Future meetings may begin to look at this.   | Sun, Dec 12, 2010 4:26 AM  | <a href="#">Find...</a> |
| 6. My suggestion is that let us not just restrict ourselves on the milling industry alone we should try to include other industries like the sugar and edible oil so that we can also hear their views and see how we can combine our efforts for a successful implementation of the whole fortification process.   | Sun, Dec 12, 2010 1:10 AM  | <a href="#">Find...</a> |
| 7. I would like us to discuss more on internal monitoring of the fortification program by industries. I would suggest that we have more time for the meetings, one day is not enough.   | Fri, Dec 10, 2010 11:49 AM | <a href="#">Find...</a> |

## 7. Do you have any other questions or comments?

| 1. The itinerary should be sent a little bit early ones participants have confirmed their participation so as to process the visas in time to avoid any inconveniences. These kind of meetings enable people form different parts of the globe to share their ideas with the various stake holders worldwide on the numerous issues concerning fortification | Fri, Dec 17, 2010 4:27 AM  | <a href="#">Find...</a> |
| 2. Just to thank you for the opportunity of sharing ideas with people a lot more experienced than I am. Fast track learning!!<br>A delight to meet all the FFI staff and apologize for the lateness of my reply as I am now in Papua New Guinea and the internet is not wonderful. I hope I can be of use to the FFI in the future.                          | Thu, Dec 16, 2010 6:51 PM  | <a href="#">Find...</a> |
| 3. /   | Tue, Dec 14, 2010 5:58 AM  | <a href="#">Find...</a> |
| 4. No - keep up the good work and THANK you for this lovely FFI family. Hope to stay a part of it for long :)  | Mon, Dec 13, 2010 1:02 AM  | <a href="#">Find...</a> |
| 5. Not this time thank you.  | Sun, Dec 12, 2010 1:10 AM  | <a href="#">Find...</a> |
| 6. Keep up with the good work.   | Fri, Dec 10, 2010 11:49 AM | <a href="#">Find...</a> |

- **Levison Kabango, Malawi:** That was my first FFI meeting and most definitely it was enjoyable and most importantly helpful as we learnt from what other countries are doing. All the topics were interesting in their own way but i particularly liked the topic of Monitoring and evaluation as its one of the most important areas in projects in our various countries. I would particularly encourage FFI to arrange such meetings regularly. I hope you invite us for the next meeting
